IN SHORT

I'm a Junior Software Testing Engineer. I focus on web services testing, manual testing. As part of the training program, I gained practical experience in QA (tested the web and mobile app, performed cross-browser testing, analyzed requirements, created checklists, test cases, bug reports, test result reports).

Participated in the graduation project for testing a WEB resource called "Prepear.com". During this project, the following experience was gained: knowledge of testing processes, using test design techniques (boundary value analysis and equivalence partitioning testing), work with various areas of testing, requirements analysis, basics of WEB and mobile testing, creation of bug reports, generation of reports based on test results.

SKILLS

- Test Rail/ Jira (experience in writing test cases, bug reports);
- Knowledge of software testing theory;
- Basic knowledge of Katalon;
- Understanding of client-server architecture, HTTP
- Postman/ Soap UI
- Virtual Box/ VMware
- MySQL/ MSSQL
- DevTools
